SILENT SEIZURE DETECTION SYSTEM

AUTOMATED EEG ANALYSIS REPORT

REPORT REFERENCE	GENERATED ON
EEG-17	15 Oct 2026, 01:51 AM

01 PATIENT & EXAMINATION DETAILS

Analysis ID	17	**Patient ID**	17
Analyzing Doctor	Nandana	**EEG File**	chb01_38.edf
Analysis Date	2026-10-15 01:46:26	**Model**	Support Vector Machine (SVM)

02 AUTOMATED ANALYSIS RESULT

MODEL CLASSIFICATION	MODEL-REPORTED SEIZURE PROBABILITY
No Seizure Detected	**6.20%**

03 INTERPRETATION

The EEG recording was processed using the configured EEG preprocessing and trained SVM classification pipeline. The classification and probability above represent the automated model output for this analysis.

The model-reported probability is not, by itself, a confirmation of a seizure or a measure of diagnostic certainty. The result should be reviewed alongside the original EEG recording and the patient's clinical information.
